

# Next generation cancer support

Providing tailored, expert care  
to help manage the impacts  
of cancer

Employer/adviser brochure

# For a changing cancer care landscape

1 in 2 people will be diagnosed with cancer

36% of people diagnosed with cancer are of working age

By 2030, 6% of the population will be living with cancer

Cancer has now been reclassified as a chronic condition

# Welcome to our partnership with the UK's first virtual cancer survivorship clinic

Our Group Income Protection is more than just a financial benefit. As part of the proposition, employees have access to our additional wellbeing services under our Be Well. Get Better. Be Supported. wellbeing framework. It gives them access to a range of holistic support services, that aims to help manage their wellbeing, and access tailored support during an illness or injury.

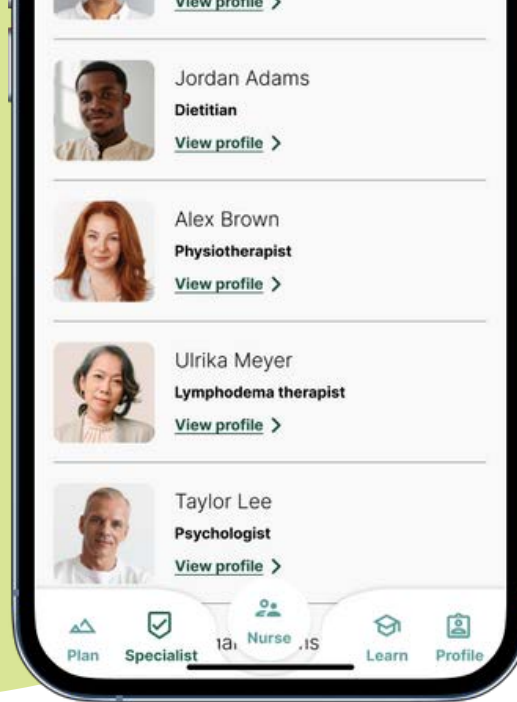

As part of this support, employees we're covering have access to a virtual cancer survivorship clinic, with the UK's largest multidisciplinary team of cancer experts, provided by Perci Health. The service is available to absent employees who have been referred to Legal & General, following an assessment with one of our Vocational Clinical Specialists. If it's deemed clinically appropriate, and there is a likelihood that the support will help and enable them to return to work, our specialists will then refer them to Perci Health. They provide online, personalised, evidence-based care designed to achieve optimal health outcomes for people living with and beyond cancer.

Perci Health is the only cancer service that combines specialist clinical and vocational rehabilitation, to support employees with the best holistic care possible - care that's personalised and tailored to them.

## Fast access

Perci Health provides fast access to confidential cancer support - delivered through both digital resources and virtual clinics with cancer experts. By providing virtual care that removes geographical obstacles designed to help significantly reduce waiting times, we can improve access to previously hard to reach cancer experts.

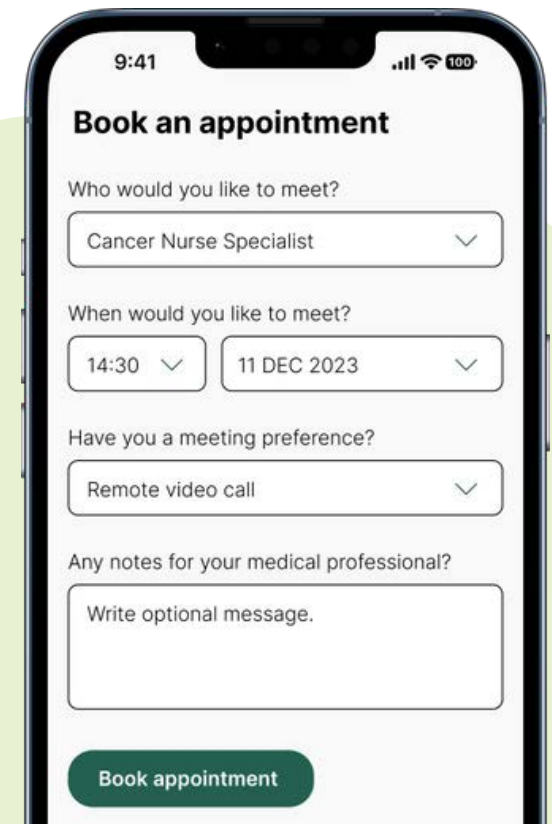

## NHS qualified, multidisciplinary team

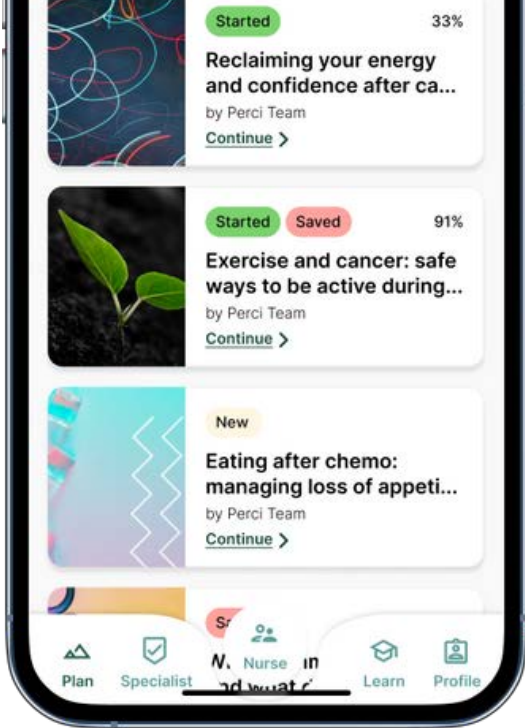

Enabling access to NHS qualified cancer specialists working together as a multidisciplinary team to provide holistic care, tailored to the employee.

## Personalised support

Employees receive a specialist and individualised approach, delivering market-leading virtual cancer care.

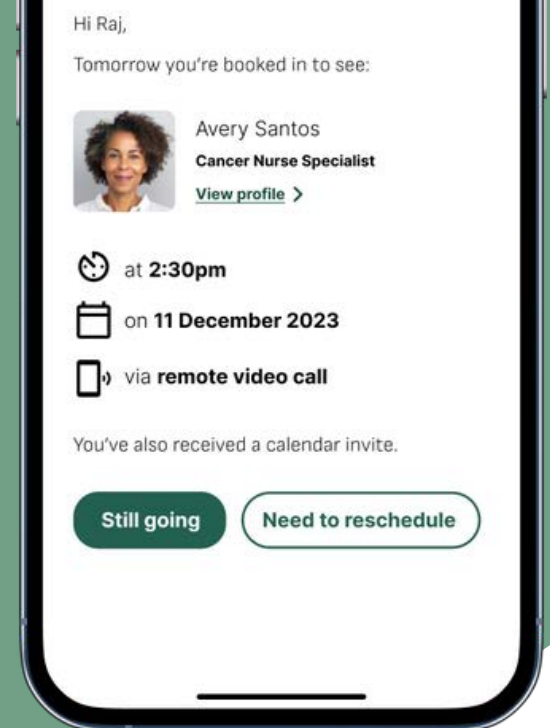

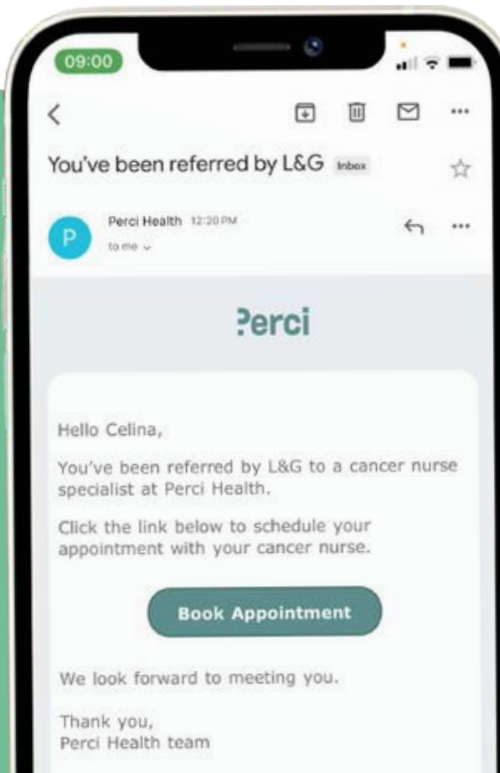

## Simple scheduling

Employees are reminded of upcoming appointments, or if additional information is required

## Expert created content

Based on a holistic needs assessment, the employee will have access to hundreds of dedicated resources to help support education and recovery from their condition.

## Better outcomes

Rehabilitation should begin from the day the employee is referred by us, and it has been proven to help improve side effect management, treatment tolerance and recovery.

# Designed to provide better outcomes for employees

Significant reduction in cancer claim duration

Clinically meaningful improvements for some of the most bothersome symptoms

Average wait time for a virtual appointment is less than 48 working hours

# Care that's centred around the individual

- Personalised and seamless care, delivered by a dedicated team.
- Vocational rehabilitation and expert clinical care for physical, psychological and practical concerns.
- Support with the impact of cancer, from care navigation as well as help to manage finances and emotions, through to complex side effects.

**“The consultations were extremely valuable not only because the experts have vast experience of the issues I was having, but because they innately understood the emotional marathon that a cancer diagnosis brings into your life.**

**To be able to quickly access the help I needed felt like a breath of fresh air, after feeling alone with problems and having no energy to hunt down solutions”.**

Ruth - Perci Health user
